Crisler Wintler

Software Engineer

Goiânia, Goiás, Brazil

Summary

I'm a web developer with experience in creating web applications using the most modern and scalable technologies on the market. Currently, the language that I use the most in my projects is JavaScript, and in most of my projects I use the Typescript superset which provides better readability, maintenance and application of best practices. I also use the Next.JS framework, which offers a wide range of tools for developing PWAs. I'm looking for a job opportunity that will enable me to learn and grow professionally, together with innovative companies and teams focused on delivering quality solutions.
